

australis™  
**CLASSIC**  
**BOMBSHELL**

# ONE OF THE MOST ELEGANTLY SEXY AND FLIRTY MAKE-UP LOOKS IS THE CLASSIC MARYLIN MUNROE, DARK DEFINED EYES AND STRIKING BOLD RED LIPS. THIS CAN SIMPLY BE TURNED FROM DAY TONIGHT JUST BY CHANGING THE LIP COLOUR

## 1 PRIMER

After cleansing and moisturising your face, priming is the next step in the beautification process. You should always use primer before applying foundation. It should be an essential part of your beauty regime.

Prime your whole face. This will fill in any fine lines, smooth out your skin and help foundation last longer. Don't forget to prime your eyelids and lips. This will avoid eye makeup creasing

## 2 FRESH AND FLAWLESS FOUNDATION AND POWDER

This formulation is for problem or oily skin. Completely oil free so it won't clog your pores. Contains calming, soothing and skin healing ingredients. Plus it's an SPF 15 which is always handy to protect your skin from the harsh Australian sun and prevent premature ageing. Apply as much foundation as you like to get your ideal coverage. Finish with a dusting of fresh and flawless pressed powder. This will set your makeup, minimising shine and help your foundation stay on all day.

## 3 LIQUID EYELINER

This is a great liquid eyeliner. The colour intensity is excellent and the brush is easy to use. Apply your line from the middle of the lash line through to the outer corner. Extend the line so that it flicks past your eye slightly for a sexy flirty look.

For a bolder night look, add either a black eyeshadow or eyeliner and smudge under the lower lash line. This will make the look more smouldering.

## 4 MEGALASH

Big thick lashes are a must with this look. For maximum volume lashes mega lash is the mascara for the job. The jumbo brush applies beautifully and evenly. This mascara can be layered for even bolder lashes. Be sure to also coat your lower lashes, these are just as important as the upper

## 5 COLOUR INJECT LIPSTICK

Big bold red lips. Big bold red lips. Knockout colour with benefits. The colour inject lipstick is such a beautiful formula, not only is it long lasting but it's also moisturising and nourishing. It's an injection of vitamins, minerals and antioxidants, your very own lip doctor. It contains Kakadu plum which is the world's highest known source of vitamin C. Vitamin C is not only soothing, but also naturally stimulates collagen formation. Like a treatment, you're lips will be healthier wearing colour inject lipstick than not wearing it. It's amazing.

If you want something more subtle, use a lighter coloured lipstick for during the day and keep your colour inject cha cha for when the sun goes down
